Rail Systems, Electrical & Communications Solutions

O'Donnell Griffin has been supplying electrical solutions and services to key Australian infrastructure projects for over 100 years. A major provider of rail-related services since 1982, O'Donnell Griffin Rail has fast become a key industry partner in everything from co-operative alliancing programs through to the more traditional 'Design and Construct' delivery model, demonstrating technical and delivery excellence across a wide range of fully integrated projects.

In spite of the current dearth of skilled resources in the rail sector, ODG Rail has worked hard at our employee development and we have skilled resources to hand both at a business and a more technical level, including:

- Project managers
- Commercial administrators
- QA and HSEC
- Engineers
- Rail signalling technicians
- High Voltage operators and testers
- Austel Communications technicians
- Radio and industrial electronic technicians
- Special class electricians
- Instrumentation technicians
- Diesel generator technicians

Specialist areas of expertise include:

- Railway signalling systems
- Communications systems
- Overhead wiring systems
- Computer based interlocking systems
- LV & HV Distribution

Complementary support services include:

- Rail station modification & upgrades
- Civil works
- Mechanical – HVAC
- Security & CCTV

Our wide portfolio of Rail project and contract work includes completed activity on the South Improvement Alliance TCC Project, Southern Suburbs Rail, Regional Fast Rail, the Jolimont Rationalisation Project and BHP Billiton's Rapid Growth Phases 1, 2 and 3 in NW Australia.

Current projects or programs above \$10m include: ongoing work in the Melbourne Rail corridor as part of the South Improvement Alliance; BHP RGP4; a lead role in the ONTRACK OHWS replacement program/upgrade in Wellington NZ; and the largest signalling contract in Australia, the NovoRail Program Alliance for Railcorp valued in excess of \$1 billion, works being delivered through the Alliance partners, Laing O'Rourke, Aurecon (formerly Connell Wagner) and O'Donnell Griffin Rail.

Our 'whole of project life' capability places ODG Rail in a unique position going forward, through industry leading program management, rail system design and rail infrastructure delivery..
