

PROJECT PROFILE

<i>Name:</i>	MILLENNIUM COAL PROJECT
<i>Owner:</i>	Peabody Energy
<i>Client:</i>	Millennium CHPP Pty Ltd
<i>Project Description:</i>	Electrical and instrumentation installation of new coal handling preparation plant and load out facility.
<i>Site Location:</i>	Moranbah, QLD
<i>Year Completed:</i>	2006

The Millennium mine is an open cut operation and is expected to commence production at the rate of 1.5 Mtpa, with the objective of increasing saleable production up to 3 Mtpa as port constraints are eased at Dalrymple Bay. Millennium will produce coking coal and PCI destined for export markets.

The scope of work carried out by O'Donnell Griffin includes:

- Bus duct and earthing
- Cable ladders
- Field devices
- Instrumentation
- Lighting and power
- Cable installation and termination
